Comment on Clarity

The notation seems good to me. Names are specified

Grade

3. Good - Good UML notation, layout and naming.

Comment on Completeness

application when you don't have a member and someone wants to check members for example! So pay attention to making objects or array list new! I couldn't see your readme file

Grade

3. Good - All artifacts contain what they should with only some minor defects, and the system could be run with most requirements working.

Comment on Content

Model classes have more responsibility than just saving data's and making objects. Codes seems a little messy to me and I felt lots of unnecessary classes. I couldn't understand why you have numbers like 1.3.2.3 in you sequence diagram.

Grade

3. Good - A most of points mentioned are very well covered, but some are lacking.

- A good review should helpful give clues to what is good and what is not and suggest changes.
- A good review should be thorough and complete
- A good review may still be of a different oppinion than yours.

A bad grade does not automatically mean that you or the reviewer gets a low grade, it is an indication of that something is not right. If you think something is wrong with the review, state your view in the comments. Be polite. You are anonymous to the other student but not to the teaching assistants. Remember different people have different views and may interpret the same information differently. Learn from this, how could you have written your file in a way that this reviewer would have liked?

Warning: This Feedback is not complete.

Comment on what you learned from this review also motivate your grading of this review.

- ☒ Not graded yet
- ☐ 0. Not even an attempt - The review has no comments and grading is wrong.

- ☐ 2. Sufficient - The review is truthful and motivates grading but the text is sparse, or the review does not seem thorough.
- ☐ 3. Good - The review is truthful and motivates the grading in a good way. A proper review!
- ☐ 4. Excellent - The review is truthful, thorough and motivates the grading in a good way. Also the review was helpful and I learned how to write better artifacts(strategy/plan/cases/report) from it
